PREFACE

This publication is the seventh annual supplement to the original bibliography which was issued in June, 1967.

The annual supplement consists of citations of documents relating to planetary quarantine; many, but not all, refer to work supported by the Planetary Quarantine Office, Planetary Programs, National Aeronautics and Space Administration, Washington, D.C. The citations are assembled to bring up to date the survey of the current literature in the field. As in previous supplements there is a listing of documents published prior to the current reporting year. These are cited because of their substantive or historic value to the planetary quarantine program.

In certain references, numerals, preceded by letter(s), are given parenthetically as part of the citation. These numbers are to assist users in the procurement of a hard copy of the document from other than the corporate source. Those citations carrying "A" numbers are obtainable, for a fee, from the

American Institute of Aeronautics and Astronautics, Inc.
Technical Information Service
750 Third Avenue
New York, New York 10017

Documents with "N", "NASA-CR", "NASA-SP", "NASA-TM-X", "NASA-TN-D" and "NASA-TT-F" numbers are available, at set rates, from the

National Technical Information Service
U.S. Department of Commerce
5285 Port Royal Road
Springfield, Virginia 22151

"NASA-SP" codes documents are also obtainable from the

Superintendent of Documents
U.S. Government Printing Office
Washington, D.C. 20402

"X" numbered documents are limited in their distribution to NASA associated or contractor personnel.

"AD" coded documents are generally available from the

Defense Documentation Center
Cameron Station
Alexandria, Virginia 22314

The availability of a microfiche of the cited document is indicated by the use of the symbol # following the reference number. In each case the fiche is available from the same source as the hard copy document. "PB" microfiche are obtainable from NTIS and "T" microfiche from the Science Communication Division, The George Washington University.

PERMUTED TITLE INDEX

Acceleration of spore disinfection by urethan and its retardatio	2
accelerometer/Development of a sterilizable high-performance	132
Adaptability of laminar air flow for contamination control	36
Adaptation of microorganisms to radiation	12
aerobiology (a survey of the literature)/Current problems in	198
(aerosol)Evaluation of filters for removal of bacteriophages fro	87
(aerosol)Evaluation of the bacterial filtering efficacy of air f	65
(aerosol)Influence of relative humidity on the survival of some	109
(aerosol)Room sterilization	20
aerosols/Method for determining virus on surfaces contaminated b	141
(aerosol)Surfaces and their cleaning	44
Aiming strategies for quarantined multi-planet missions	178
airborne contamination/New ways to control	29
airborne microorganisms. III. Effects of temperature/Survival o	4
Alumina-attached spores of <u>Bacillus stearothermophilus</u> for the c	188
analysis by means of a linearizing transformation of position va	151
Analysis of microbial burden data	217
analysis/Planetary quarantine	150
Applications of sterilization math modeling techniques to planet	106
assay areas/Thermal resistance of microbial populations occurrin	277
(assay)A report on microbial contaminants in solid propellant	61
(assay)Evaluation of the bacterial filtering efficacy of air fil	65
Assessment of microbial contamination on space hardware	43
atmospheric entry heating - Jupiter/Spacecraft microbial burden	233
automated bacterial identification by impedance measurement/Rapi	208
(Aw)Ecology and thermal inactivation of microbes in and on inter	176
(Aw)Environmental microbiology as related to planetary quarantin	189
(Aw)Heat resistance of bacterial spores at various water activit	6
(Aw)Heat resistance of bacterial spores at various water activit	84
(Aw)Microbiological studies	135
(Aw)Relative humidity and the killing of bacteria: The variation	17
(Aw)Survival of microbial spores under several temperature and h	195
<u>Bacillus</u> sp. ATCC 27380: Spore with extreme resistance to dry he	202
(<u>Bacillus subtilis</u>)Acceleration of spore disinfection by urethan	2
<u>Bacillus subtilis</u> spore contamination from stainless steel surfa	42
<u>Bacillus subtilis</u> spores by hydrostatic pressure/Retardation of	3
Back contamination and quarantine containment requirements for m	143
(back contamination)Planetary quarantine, principles, methods, a	161
(back contamination)Pollution in space	165
(back contamination)Protection of the Earth's biosphere from lun	103

(back contamination)Review of space research	25
bacteria on metal surfaces/Survival of	88
bacteria. II. Selection changes in oxidative activity associate	11
bacteria subjected to moist heat/Death of	69
bacterial growth in liquid media/Use of radiation techniques for	59
bacterial propagation during prolonged space flights/Some means	72
bacterial spores at various water activities/Heat resistance of	6
bacterial spores/Effect of nickel-cadmium batteries upon	38
bacterial spores from the inner walls of a stainless steel cup s	282
(bacterial spores)Studies for sterilization of space probe compo	33
bacterial spores/Study of the combined effects of ionizing and s	16
bacterial spores to sterilization by moist and dry heat/Resistan	23
bacterial spores to temperatures in the higher range/Technique f	1
(balloon)Microbiological investigations during spaceflight	251
(barrier)Microbic contamination control	49
Basic design requirements for laminar air flow dust control devi	50

BOOKS CONTAINING
PLANETARY QUARANTINE RELATED MATERIAL

Each of the following books, cited in this bibliography, contains information pertinent to the substantive program of the NASA Planetary Quarantine mission.

Aerobiology, proceedings of the 3rd international symposium, Sussex, England. 1969. Silver I.H. ed. New York, N.Y., Academic. 1970.

Air Force Manual, Criteria for Air Force clean facility design and construction. Washington, D.C., Department of the Air Force. 1968. AFM 88-4, Chapter 5.

Antarctic Terrestrial Biology, Antarctic Research Series. Washington, D.C., American Geophysical Union. 1972. Vol. 20.

Biology and the exploration of Mars. Pittendrigh, C.S., W. Vishniac and J.P.T. Pearman, eds. Washington, D.C., Space Science Board, National Academy of Sciences/National Research Council. 1966. Publication 1296.

Chemistry in Space Research. Landel, R.F. and A. Rembaum, eds. New York, N.Y., Elsevier. 1972.

Chemical Sterilization. Borrick, P.M. ed. Stroudsburg, Pa., Dowden, Hutchinson and Ross. 1973.

Developments in Industrial Microbiology. Vol. I. Miller, B.M. ed., New York, N.Y., Plenum Press. 1960.

idem, Vol. 14. Murray, E.D. ed. Washington, D.C., American Institute of Biological Sciences. 1973.

Dispensing of Medication. Martin, E.W. ed. Easton, Pa., Mack. 1971

Essays in Cryobiology. (Ocherki po Kriobiologii) Leningrad. Iza-vo Nauka. 1972.

Industrial Sterilization. Phillips, G.B. and W.S. Miller, eds. Durham, North Carolina, Duke University Press. 1973.

Life Sciences and Space Research Vol. XI, Sneath, P.H.A., ed. Berlin, Akademie-Verlag. 1973.

Modern Methods in the Study of Microbial Ecology. Rosswall, T., ed.
Stockholm, Rotobekman. 1973.

Planetary Quarantine, Principles, Methods, and Problems. Hall, L.B.
ed. New York, N.Y., Gordon and Breach. 1971.

Problems in Space Biology, Vol. 16, Chernigovskiy, V.N., ed. Moscow.
1973

Space Materials Handbook. Rittenhouse, J.B. and J.B. Singletary, eds.
Washington, D.C., NASA. 1969. 3rd ed. NASA SP-3051.

Theory and Experiment in Exobiology. Vol. 2. Schwartz, A.W. ed.
Groningen, The Netherlands, Wolters-Noordhoff. 1972.

Thermobacteriology in Food Processing. New York, N.Y., Academic. 1965.

JOURNALS PUBLISHING

PLANETARY QUARANTINE RELATED ARTICLES

Below is an alphabetical list of journals in which articles germane to planetary quarantine have been published. The number of articles from each journal cited in this bibliography is indicated parenthetically.

Acta Microbiologica Polonica, series B (Poland)	(1)
Aerospace Medicine	(1)
American Journal of Hygiene	(4)
American Journal of Public Health	(1)
American Society of Heating, Refrigeration and Air-conditioning Engineers Journal	(1)
Antarctic Journal of the United States	(3)
Applied Microbiology	(11)
Association for Operating Room Nurses Journal	(1)
Astronautics and Aeronautics	(2)
Atomwirtschaft (West Germany)	(1)
Australian Journal of Biological Sciences	(1)
Bioscience	(1)
Bulletin of the Parenteral Drug Association	(2)
Canadian Journal of Microbiology	(1)
Food Technology	(1)
Health Laboratory Science	(2)
International Committee of Scientific Unions Review	(1)
International Journal of Experimental Studies	(1)
Journal of Bacteriology	(5)
Journal of General Microbiology (United Kingdom)	(2)
Journal of Microbiology, Epidemiology and Immuno- biology (USSR) Zhurnal Microbiologii, Epidemiologii i Immunobiologii	(2)
Journal of Pharmaceutical Sciences	(1)
Journal of the Acoustical Society of America	(1)
Journal of the American Association for Contamination Control	(2)
Journal of the American Medical Association	(1)
Journal of the Astronautical Sciences	(1)
Kerntechnik (West Germany)	(1)
Natural History	(1)
Nature (United Kingdom)	(4)
Official Digest, Federation of Paint and Varnish Production Clubs	(1)
Proceedings of the Royal Society (United Kingdom)	(2)
Quality Assurance	(1)
Science	(2)

Soap and Chemical Specialities	(2)
Soil Biology and Biochemistry (United Kingdom)	(1)
Space Biology and Medicine (USSR) Kosmicheskays Biologiya i Meditsina	(1)
Stiinta Si Technica (Rumania)	(1)
Space Life Sciences (The Netherlands)	(4)
Zeitschrift fuer die gesamte Hygiene und ihre Grenzgebiete (East Germany)	(1)

PROCEEDINGS PUBLISHING

PLANETARY QUARANTINE RELATED PAPERS

Below is an alphabetical list of proceedings in which papers germane to planetary quarantine have appeared. The number of papers from each meeting cited in this bibliography is indicated parenthetically.

- American Institute of Astronautics and Aeronautics. Annual meeting. Denver, Colorado. 1973. (1)
- AIAA/ASME Structural and Materials Conference. Cocoa Beach, Florida. 1966. (1)
- American Astronautical Society. Space projections from the Rocky Mountain Regions. Denver, Colorado. 1968. (2)
- American Institute of Biological Sciences, Planetary Quarantine panel meetings. Atlanta, Georgia. 1972; Cape Canaveral, Florida. 1973. (2)
- American Society for Microbiologists. Washington, D.C. Bacteriological proceedings. 1962; Bacteriological proceedings. 1964. (3)
- Automated methods in bacteriology, international symposium. Stockholm, Sweden. 1973. (1)
- Cleaning conference. Marshall Space Flight Center, Huntsville, Alabama. 1966. (1)
- COSPAR XVI Plenary meeting. Konstanz, West Germany. 1973. (5)
- Environmental effects on aircraft and propulsion systems. Proceedings of 10th national conference. Philadelphia, Pa. 1971 (1)
- Instrument Society of America, 5th symposium on temperature, its measurement and control in science and industry, proceedings, Pittsburgh, Pa. 1972. (1)
- International Astronautical Federation. 17th International astronautical congress. Madrid, Spain. 1966. (1)
- Life Science Committee, NAS/NRC. Subcommittee for review of planetary quarantine. Washington, D.C. 1973. (1)
- Soviet conference on space biology and medicine. USSR. 1966. (1)
- National planning conference on design for asepsis. New York, N.Y. 1964. (1)

CORPORATE SOURCES

Below is an alphabetical address list of NASA centers, NASA contractors, and other sources of the material cited in this bibliography.

Air Force, Department of the
Washington, D.C. 20333

American Institute of Biological Sciences
1401 Wilson Boulevard
Arlington, Virginia 22209

American Society for Microbiologists
1913 I Street, N.W.
Washington, D.C. 20006

Ames Research Center
National Aeronautics and Space Administration
Moffett Field, California 94035

Army, Department of the
Fort Detrick
Frederick, Maryland 21701

Avco Corporation
Space Systems Division
Lowell Industrial Park
Lowell, Massachusetts 01851

Bactomatic, Inc.
Palo Alto, California 94300

Becton, Dickinson & Co.
Research Center
P.O. Box 12016
Research Triangle Park
North Carolina 27709

Boeing Company, The
Aerospace Group
P.O. Box #3999
Seattle, Washington 98124

Center for Disease Control
Phoenix Laboratories
4402 North Seventh Street
Public Health Service
U.S. Department of Health, Education and Welfare
Phoenix, Arizona 85014

Dynamic Science Corporation
1900 Walker Avenue
Monrovia, California 91016

Exotech Systems, Inc.
1200 Quince Orchard Boulevard
Gaithersburg, Maryland 20760

Florida State University
Department of Statistics
Tallahassee, Florida 32306

Food and Drug Administration
Cincinnati Research Laboratories
U.S. Department of Health, Education and Welfare
1090 Tusculum Avenue
Cincinnati, Ohio 45226
